

Project Profile

Watergate Villas East | St. Thomas, VI

SRG Roofing is pleased to announce the successful completion of its fluid applied roofing project on the Watergate Villas East Condominiums located on island of Saint Thomas in the US Virgin Islands. This property was in need of a new roof, but because of shipping limitations and the need to recycle and filter rain water for human consumption, there were a limited number of roofing products available for this specific application. SRG Roofing was contracted to furnish and apply a fluid applied food grade silicone roofing system on all four buildings in the complex. This project was spurred by the partnership between SRG Roofing and National Coatings. SRG Roofing applied 18,000 square feet of food grade silicone roof coating that was manufactured by National Coatings. SRG Roofing is an Approved Applicator for National Coatings and was able to provide the client with a 20 year full system warranty that covers both labor and material defects. If you have a similar project and would like for SRG Roofing to provide you with a quote, please visit www.srgroofing.com or call us 855.860.3732.
